

Want to TICKLE Your Presentation?

Remember the TICKLE acronym to help you construct your power-point or flipchart presentation. TICKLE your presentation!

TITLE – Give each slide a clear title or message

IMAGE – replace words with images that act as your prompt

COLOUR – 30% of males are colour blind so don't use red and green together

KISS – Keep it short and simple, 1 message per slide

LARGE – Let people at the back see the slides and images, fill the space

EDGE – edge or border your slides to focus on the information contained in the slide

Once you are TICKLED, you can begin work on your content....but that's another lesson to come!

If you want presentation advice, training, coaching, critique services please just let us know and we'll call you for a chat!

Your Impact!
